### Alexandria Gazette.

THURSDAY EVENING, JULY

Going Round the World. In sailing around the world east ward the days are each a little less than twenty-four hours, according to the speed of the ship, as the sun is met a little earlier every morning These little differences added together will amount to twenty-four hours This gives the sailors an extra daynot in imagination, but as an actual fact. They will have done an extra day's work, eaten an extra day's ration of food and imbibed an extra day's allowance of grog.

On the other hand, in sailing west ward the sun is overtaken a little each day, and so each day is rather longer than twenty-four hours, and clocks and watches are found to be too fast. This also will amount in sailing around the world to the point of departure to one whole day by which the reckoning has fallen in arrears. The eastern bound ship, then, has gained a day and the western bound ship has lost one. This strange fact, clearly worked out, leads to the apparent paradox that the first named ship has a gain of two whole days over the latter, if we suppose them to have departed from port and returned together.-Philadel-

Modern Gold Mining. Up until about 1850 only placer or surface gold was mined-that is, free gold, deposited in the beds of streams in sands and in the crevices of rocks. Placer mining, mainly in new and remote regions, still furnishes a material though not a large percentage of the world's output. Formerly the alluvial gold was separated from the sands and gravels containing it by washing them in pans, cradles, rockers and sluices. In 1852 the hydraulic method was first employed in California. By this means a "giant" stream of water turned against the side of a mountain washes everything before it. The gold settles to the bottom of the tunnel or sluice through which the gravel, sand and water flow. In 1889 dredges or excavators were first used in Australia. Today steam and electric dredges produce a considerable portion of the

world's output .- Byron W. Holt in Ev-

erybody's.

Why Boiled Water Freezes Easily. Water which is hot of course cannot freeze until it has parted with its heat, but water that has been boiled will, other things being equal, freeze sooner than water which has not been bolled. A slight disturbance of water disposes It to freeze more rapidly, and this is the cause which accelerates the freezing of boiled water. The water that has been boiled has lost the air naturally contained in it. which on exposure to the atmosphere it begins again to attract and absorb. During this process of absorption a motion is necessarily produced among its particles, slight certainly and imperceptible, yet probably sufficient to accelerate its congelation. In unboiled water this disturbance does not exist. Indeed, water when kept perfectly still can be reduced several degrees below the freezing point without its becom-

A Bismarck Incident. It used to be the privilege of Austria's representative at any conference of representatives of the German states to smoke, the others refraining. This was supposed to be an acknowledgment of Austria's supremacy. At the first conference that Bismarck attended as Prussia's representative he began to puff smoke across the conference table as soon as the Austrian diplomat li up. That set everybody pres ent to smoking on equal terms, and Austria's supremacy got a blow.

## You Can Have a Model Kitchen

as cool and white as a dairy. No smell, no smoke, no heat, no dust. No old-fashioned contrivances. The

# New Perfection

is the latest practical, scientific cook-stove. It will cook the most elaborate dinner without heating the kitchen.

Boils, bakes, or roasts better than any range. Ready in a second. Extinguished in a second. Fitted with Cabinet Top, with collapsible

rests, towel rack, and every up-to-date feature imaginable. You want it, because it will cook any dinner and not heat the room. No heat, no smell, no smoke, no coal to bring in, no ashes to carry out. It does away with the drudgery of cooking, and makes it a pleasure. Women with the light touch for pastry especially appreciare it, because they can immediately have a quick fire, simply by turning a handle.

No half-hour preparation. It not only is less trouble than coal, but it costs less. Absolutely no smell, no smoke; and it doesn't heat the kitchen.

The nickel finish, with the turquoise blue of the enameled chimneys, makes the stove ornamental and attractive. Made with 1, 2 and 3 burners; the 2 and 3-burner stoves can be had with or without Cabinet.

Every dealer everywhere; if not at yours, write for Descriptive Circular to the nearest agency of the

Standard Oil Company (Incorporated)

The Simple Diet.

There is a certain banker and broker doing business not a hundred miles from the bank, says a London weekly. whose health for some time has not been all that he could desire. Not long ago he was complaining to his brother, when the latter after a careful survey of his brother's counte-"What you need, old man, is plain

country food. Come to my place in the country and we'll soon set you up. This rich food is proving too much for you. Take breakfast, for instance. All I have is two cups of coffee, a bit of steak with a baked potato, some toast, together with a bit of watercress or lettuce. What do you bave?" For a moment the city banker gazed

in hearty admiration at his brother. "A cup of hot water and two slices of dry toast." he replied soberly. "But, Jim, if you think a simple diet like yours will 'set me up,' why, I'm per-

fectly willing to try it." The Story of "Hard Hit." "Mr. Orchardson, if I thought that

heart." Such was the remark made by Pellegrini, the famous caricaturist, to the Royal academician, Sir William Orchardson, when at a private view be first saw "Hard Hit," the picture of the ruined gambler. "It was," said the artist. "the greatest compliment I could have had." Curiously enough, A glacier when it dislodges itself and gamester was rather fond of cards "What is the matter?" be asked. panions. The Eskimos call this phe- was awfully hard hit last night," he nomenon "the duck and ducklings," answered. "By Jove." replied the and any one who has watched the artist, jumping up with delight, "I've progress of the wild duck followed by got it at last! > Six Fallies of Science. The six follies of science are the squaring of the circle, perpetual motion, the philosopher's stone, the elixir

In all ages men of undoubted ability brought by the wind, take root and have toiled early and late to unravel the mysteries supposed to be connected with these fascinating problems. It is not always remembered that such intellectual glants as Bacon, Sir Robert Boyle and Sir Isaac Newton sought the philosopher's stone. In the study of astrology Lilly was for a time even pensioned by parliament,

Most of these "follies" conferred indirect benefits upon science, for in Chickens 20c lb. seeking one thing their devotees discovered many another. The craze for the secret, or unknown, has still its hold upon men and is seen in palmistry and kindred cults.
